July's meeting started with two announcements on a somber note

We have learned of the surgery and rehabilitation of Bill Winchell, He is currently in the Vineyard Hills in Templeton, CA . Doctors feel he can receive necessary care and makes the drive for his wife Linda much closer. If you care to stop by and vist, he is in room 158.

Continuing, word has been received that Mike Magrill's wife Cheri has passed away after a long battle with cancer. No services are planned at this time.

Condolences to Mike and his family and hope for a speedy recovery to Bill Winchell.

The June sawdust session was held in George's shop and featured threading of wood and Fountainhead Solid material. Threading was done to achieve two different thread structures, 16TPI and 8TPI.

Mike Rude will offer a Sawdust session on Hollow turning using the latest camera techniques. It will be held in his shop on August 27th. He is located at 6350 San Gabriel Road in Atascadero, start time will be 9:00AM.

Some suggestions for future sessions are being considered.

Show and Tell was very, very thin. Since we dropped challenge project the show part is lacking participation.

There will be a challenge for July with an end goal which will be covered later in this issue.

Larry Truesdale started with a bowl that he described as looking like a flower pot

This was turned from Redwood, Larry pointed out that he let it stand for a few months to see if it developed any cracking, so far, so good.

Larry's second offering was a pepper mill with a different grain pattern, it is Black mango. Where can this "Black Mango" be found?

# Show and Tell Continued

Tom Bullock showed us two turned Urns from Acacia with a approx turned cap of a segmented screw fixture

Bob Gleason proudly showed a bowl he made a copy of which was donated to the "Heart Patients Club". He made it from Juniper Cedar" and enhanced it with brass inlay. His wife Anita liked it so much he had to duplicate one for her.

Gordon Rowland presented some photos of bowls made way back in the 1200's. He was able to photograph them on a recent trip to Ireland & Scotland

As you have seen and read Show and Tell was very sparse, so For the August meeting we are asking all to bring in a BOWL.

There is a contact that we are trying to solidify that is responsible for a fund raising activity to help those facing homelessness and poverty

All types of bowls will be greatly appreciated.

Dan Ross brought to the meeting a friend and former Woodshop teacher who now lives in Paso Robles. Lets hope that John Crother will soon be a member. He did tell us that he does a lot of Segmented work

Ernie Miller has told me that his wife Carol lee has been hospitalized with a medical condition, here again lets hope that she'll be home soon. Ernie was disappointed that missed the threading sawdust session because he wanted to show his Baxter threading device, he plans to bring it to the August meeting..

#### DATES TO REMEMBER AND PLAN ON

Saturday August 13th Next Meeting

Saturday August 27th Hollow bowl with camera demo at Mike Rude's shop.

Sunday October 2nd Annual Fall picnic, Nipomo County Park.
