CHALLENGE
FOR MARCH

March 2011

IMPORTANT NOTICES

March Meeting will be held on SATURDAY MARCH 12th
This is due to a schedule need of the hall

2nd Notice

There will be a turning demonstration by **Chris Pytlik** of UTAH on Tuesday MARCH 8th, starting at 9:00 AM in **Paul Bujold's** shop. Shop is located at 440 Eucalyptus Road in

- Nipomo
- Chris's demonstration will consist of hollow form and bark edge turning further highlighted by a novel way of coloring.

The usual fees will apply. \$25.00 for CCW members and \$35.00 for visitors

This will be an all day demonstration, we will try to break at noon for lunch, there are several fast food restaurants in Nipomo and Brown Bagging is acceptable

Due to the Gasoline pricing, car pooling is highly recommended.

If you need a list of members to seek out pooling, contact George Paes.

February Meeting Recap

First may I apologize for the lack of photos in this issue. I again forgot to bring the camera so I am asking folks like **John Long** and **Gordon Rowland** to be official photographers.

There was a very prominent display of Wine Bottle Stoppers, Monthly challenge Goblets and Many Show and tell items. Again my apologies.

Bill Peterson saved some of the day when he forwarded the photo below of the accumulated stoppers for the Rotary Fund Raiser. Bill is elated with the turnout, we also got a stopper from **Scott Layman of Jacksonville, Florida**

CCW Chapter News

On Saturday, I chatted with both **Bob & Anita Gleason** to learn that Bob is home after a 9 day stay at the hospital. He is able to move around a bit and feels he's getting stronger every day. Before Bob went into the hospital he told me he hoped to be up and around to attend the Pytlik Demo, Lets hope so and look forward to seeing him there

As I reported at the meeting, the response for suggestions for up coming outside extra Curricular activities was very sparse. The main topic is to consider changes for the "Holiday Luncheon", the picnic set up will remain the same.

Several voices were heard with suggestions, it would be best if you have an idea as to where, when and what type of changes can be feasible. Among the suggestions submitted are, after the holiday season, having catered and also a pot luck lunch.

I hope some solid ideas are submitted soon.

Show & Tell

Terry started off the session with a Bark Edge Bowl turned from Osage Orange, that was salvaged via **Tom Bullock** from the San Luis Obispo city yard.

Tom Bullock offered two hollow forms turned from Spalted Cypress

Bill Kandler showed the results of his cutting and gluing 24 sections to be incorporated in an up coming segmented project

Show & Tell Continued

Rick Haseman presented his shop made jig for drilling work on turned items.

Ernie Miller brought in two shop made long handled chisels used in deep bowl turning. These handles were fabricated from common steel pipe. The reason was to create better leverage in front of the tool rest. He showed two Urns turned with these tools and finished with Gold plated threaded inserts for screw safe security in Urns,

George showed a twist in Bottle stoppers that can be used as a Friendship or companion Urn. Also two hollow forms turned green and thin, a bit of a split in the bottom thicker section of the form.

Gordon, who was not in attendance due to some crazy excuse like work offered a nicely detailed hollow form of Mahogany which is the holder for the Finial Wine bottle stopper.

Upcoming activities

Reminder: **Chris Pytlik** demonstration on TUESDAY March 8th Starting time 9:00 AM **Pauls** shop, 4440 Eucalyptus Road , Nipomo CA

AAW annual symposium will be held June 24,25 & 26th in St Paul MN. There is a highly qualified group of turners doing many rotations. For information, go to inquiries@woodturner.org

Bill Peterson and **George Paes** will attend the Drawing for wine luncheon along with the club lathe to turn the Ceremonial 100th Stopper to complete the challenge on April 14th

Activities Continued

Where as we have several novice turners in our group and with hopes of attracting more turners of all caliber, a call has gone out to try to land a few more demonstrators and set up future “SAWDUST SESSIONS.

With 3 sessions,(2 meetings & 1 demo) in a 7 week span it might be good to plan for a SAWDUST session in May. **Barry Lundgren** and **Mike Rude** have offered their shop ,we must see who will be free in May. before it gets to hot . **Bill Kandler** has offered so lets look toward June or July where it should be a bit cooler

For those sessions we can look forward to learning about Proper work holding devices, as in chucks and steady rests etc. Hollowing and finishing will also be considered. If you have an area of turning that you'd like to see demonstrated and discussed, please drop **George** a note to create a file.

Challenge for March

The Magic spinning wheel chose the challenge to be a turned

Finial

One last thought, with Gas prices going out of sight, try to give some thought to car pooling. Those of you in both North and South of our meeting places should try harder to car pool, we don't want to lose members because of the wacky conditions in the far East and lack of action in our Government

Don't forget your contribution to HOSPICE a very worthy cause. Be sure to note your name and wood species.

The photo above was a late addition from face book. It was described as the base of a table turned from 45,000years old Kauri. The table will seat 8 for dinner.

Ernie, did you lend your long handled tools to this gent? This shows how important leverage is.

**DON'T FORGET GIFT FOR HOSPICE
Bring in to MARCH meeting**

Don't Forget, Dues are now DUE
