

Central Coast wood Turners

Announcements for the upcoming month of October

A quickly arranged demonstration by Paul Fennel of Arizona and high standing with AAW has been scheduled for Wednesday Sept16th to be held in Bill Kandler's shop at 792 Phillips Road in Arroyo Grande starting at 9:00AM ending about 1:00PM. This is a half day show and fees per member is \$15.00

Information on Paul's work can be viewed on GOOGLE, worth the visit.

During the past week or so some events have come to be noted.

A major change in the picnic date was made per suggestion of Doug Brown in that we can again have the culinary expertise of Gordon Rowland at the grill

DATE TO BE NOTED Sunday October 25th assemble time NOON

Top Block steak and Salmon will be provided by your CCW treasury

Memberse asked to bring a share plate and service

CCW has received a load of items to be given as prizes to the BOCCE Ball winners, to participate you must have a TURNED Wood Ball any where between 3 and 4 inches in diameter, the rounder the better.

Prizes include many gift certificates to Craft Supply of Provo and Packard woodworks of Tryon, N.C., also included are two big boxes of various size and species of wood and as usual several bottles of wine.

Mark it on your calendar.

A sample package was received and delegated to Mike Rude to develop a new product from a company named Backgate Industries of Texas. This unit combines a pepper mill and salt shaker all in one. When complete, mike will give us his findings, Stay tuned.

Gordon Rowland has researched and purchased several sheets of "FISH PAPER" from a company titled K&G Finishing Supplies, Address is 1972 Forest Ave, Lakeside, AZ 85929-5743.

Several blanks for pepper mills have been made up of Maple and Red & Black sheets of the material. The material is made up of various thicknesses in 12"x12: sheets, Red, Black & White are the three colors ordered.

A short discussion was held to determine the continuation of "A Challenge Project" as so little are the entries. The new topic will be an encouragement of more Show and Tell, it is hoped to have presentations that are informative to all by describing the material used, the process of finishing and any description of its turning process. SO now try to have at least on piece for this meeting time.

Rick Haseman started the S&T with 2 similar in shape pedestal bowls, wood was Purple Heart and Tigerwood, not the golfer, He confessed that the shape came about because of a slight accident, a chip breakoff led him to incorporate the final scallop design, well done.

Ernie Miller (left) offered for inspection a hollow for with a tight fitting cap. The wood was Rainbow Tulip Poplar, very different.

Ernie was sporting his Donald Trump Hair style

Rick also showed a BIG spinning top that was put into motion by using a portable drill

Art Everett his square bowl with a round opening, He also introduced to some of us

Art Everett Proudly offered a square piece with a round opening along with a new item to your writer, Wine Bottle Stopper turned from GRAPE VINE Stock Root, Very Appropriate

Ron Glahn did his contribution to the Beads of Courage campaign, Thanks to he and Dave Burns

Dave Burns Also did his share in donating a lidded Redwood bowl for the Beads of Courage. We should all be reminded Bowls for Beads of courage are always welcome

This newsletter is a bit hastily written so as to get the news of the Paul Fennel Demo out in time.

Central Coast Wood Turners are a chapter of the American Association of Wood Turners

The next meeting will Saturday October 10th at the Odd Fellows hall, 520 Dana St San Luis Obispo, CA

Meetings start at 9:00AM
