Treasurer
Terry Cohen
805 747 4584

Librarian
Don Barr
805 226 8252

Next Meeting
Saturday
October 8th
9:00 AM
Odd Fellows
Hall;
520 Dana St
San Luis
Obispo, CA

Reminders were announced and they are!

Next up is the Alan Carter demonstration at Bill Kandler's Shop, address is 792 Phillips Road in Arroyo Grande. Start time will be 9:00 AM with a lunch break about 12 and continue until about 4:00 PM. Plenty of good restaurants in Arroyo Grande and Bill's patio makes for beautiful scenic dining. Be reminded that Members cost is \$25.00 and Non Members is \$35.00.

Next up on a quick turnaround will be our annual Fall Picnic, this being held on Sunday, October 2nd at the Nipomo County Park on West Tefft St in Nipomo. Take the road between Library and Dana School to Pine Section. Gathering starts at 11:00 AM.

This year we will add some competition to our social event with a FRISBEE toss that could win for you and your significant other prizes. The unofficial rules are that ALL participants will be given a number from a drawing and will attempt to hit the target in that numerical order and continue until all prizes are won. The initial toss will be attempted at 40 Feet and reduced if we have trouble hitting the target. This could become an annual challenge if well accepted.

Be reminded that CCW will furnish the entrees of Beef and Salmon. Members are asked to supply their own place settings and a SHARE DISH. Bring your adult beverage of choice. CCW will have both club lathes at the park for a EGG CUP CHALLENGE. Might be a good idea to bring along a few chisels.

Notices & Updates

Steve Goode was to have been a demonstrator of his OVAL TURNING LATHE but was a no show, an attempt will be made to have him show at another date.

Dean Atkins of Bay Area Turners has sent out a memo requesting that if interested helpers are needed to man video cameras, help in the Instant Gallery and other "Goffer" duties. If you have a desire to participate contact Dean Atkins at ADKD@chevron.com.

Terry Cohen , George Paes Paul Bujold and several others have participated in these activities. 1st advantage is the close up view of the proceedings .

Bud Maley has returned the Delta Mini club lathe but not before he received a duplicate of it for himself. He found the lathe to do exactly what he wanted to do and possibly more. If anyone is considering such a purchase, he or she should contact Him or George for particulars. He was told that prices will be raised as of October 1.

Challenge Project

The Challenge Project for September will actually carry over to the Picnic. Frisbee's were shown by several members so to looks like we'll have a completion on our hands. I hope we don't hear from significant other "Why didn't you make me one".

Those shown varied in size, species and shape. It's a good idea to test flight them , perhaps on a soft lawn.

Update

Word has been received from Chef Specialties that their web site has information that can be downloaded on the methods of fabrication and assembly of their Salt & Pepper mills. Go to

www.chefspecialties.com/howtoassemblesaltmill

And same for Peppermill.

The print out gives clear views and instructions.

Show & Tell

Bill Kandler started the session with an announcement regarding a problem with the thread configuration of his Lathe spindle and assorted accessories, as in Chucks, faceplates etc.. He has since notified me that the problem has been solved with the acquisition of a thread chaser. He continued with hollow forms of various colors and shapes that were turned at his attending the Olympia Woodturners Symposium in Washington. He made mention of the materials he used in the coloring and coating by using a product called Z-POXY Resin. If you want and need more info on this product, it is suggested that you pick Bill's brain.

Rick Haseman showed several versions of his Steins turned from segmented piece of Colored plywood. Rick went on to say he ordered this material from Cousineau Wood products in Maine and they will make up color combinations to your spec's.

Cousineau can be found on the internet at cousineauwoodproducts.com

Kenny More offered for viewing his version of an arrow through a hollow form possibly turned from Silk Wood. He had his Frisbee turned from "Blue Pine".

George Showed his latest Urn turned from Segmented Maple and Zebrawood. With the usual threaded top.

George's crudely turned Frisbees were made from Oak Veneer plywood.

Bud Malley presented his Mahogany Frisbee, I didn't note, but was it turned on the Delta?

Doug Brown Brought to the table two good size bowls turned from Green Oak, capacity unknown?

John Long fashioned his Frisbee from 1" Pine stock

This upcoming Frisbee thing should bring us some laughs and a bit of competitiveness.

BILL CLARK DEMO

A DVD disc is now available thru the CCW library. There were some copying and production problems but between Terry Cohen and Bill Kandler they have been corrected. A copy was sent to Bill in Bakersfield with thanks.

This next date is still a way off but good to note when you receive your 2012 Calendars .

Sunday January 15th has been chosen for our Winter Holiday Luncheon at a Paso Robles Winery . More info will be forwarded as it becomes available

I apologize for the lack of photos in this issue of the CCW Newsletter. I completely forgot to bring my camera, I guess that John Long did too and Gordon was in the air over the Atlantic for his vacation with Jane in Eastern Europe.

CCW wishes to Welcome Maryalice Birk to our chapter and we hope that George Maples who visited for the 1st time will join our ranks soon.

Hope to see you with FRISBEE in hand on the 2nd of October

The photos above came from Bud & Mary Maley, they came from out of the Blue
Thank you

WHEW

An Angel came out bof the BLUE, Those earlier photos are from the camera of bud & Mary Maley
